### SUMMARY

Computer Engineering graduate (FIAP) with over 4 years in the Retail Department at Bradesco: I started as an intern, was hired as an IT Support Analyst and now work as a BI Analyst on the Information Systems and Management Reporting team. I analyze data in SQL Server and Databricks and I am responsible for version control and deployment of the applications built by the area. I focus on infrastructure and automation in Linux environments, with projects in Jenkins, VMware vSphere, Terraform and Vagrant, and I am learning OLVM. Microsoft AZ-900 certified, preparing for the AZ-104. I am looking to move into DevOps, combining my experience with data and with delivering to production.

### PROFESSIONAL EXPERIENCE

#### Bradesco · Retail Department

Feb 2022 – Present

##### BI Analyst I · Information Systems and Management Reporting

Jun 2026 – Present

- Serve internal clients such as directors, managers and the branch network with management reports and applications built by the area.
- Data cleaning and analysis in SQL Server and Databricks.
- Responsible for version control with Git and GitHub and for deploying the area's applications, running the release process through the existing CI/CD pipelines in GitHub Actions.
- Monitoring of the applications in the production environment to ensure high availability.

##### IT Support Analyst Jr. · hired full-time after the internship

Jan 2024 – May 2026

- Operated remote broadcasts and meetings for directors and managers (Webex, Teams, Stream, Zoom).
- Provided infrastructure support to departments, boards and regional management, and helped procure IT resources.
- Handled pre-audit and controls governance processes; supported projects for the Retail, Prime and Express segments.
- Invited by my manager to join the Information Systems and Management Reporting team, moving into data analysis and BI.

##### IT Intern

Feb 2022 – Dec 2023

- Supported remote broadcasts, segment projects and the infrastructure of departments and boards; assisted with pre-audit governance.

##### Support Analyst Intern · Rádio Jovem Pan

Dec 2020 – Jan 2022

- Internal customer support, system access management, and preventive and corrective maintenance of IT infrastructure.

### TECHNICAL PROJECTS

- **Database pipeline:** being published on GitHub, in the process of being adapted for MySQL, PostgreSQL, SQL Server and Oracle.
- **HomeLab:** virtualization server with a local AI model (Python).
- **Terraform + vCenter:** VM provisioning from a template using infrastructure as code.
- **Vagrant + vSphere:** reproducible VM creation on a vSphere server.

Repositories at [github.com/MarcosCantelli](https://github.com/MarcosCantelli)

### ACADEMIC PROJECTS (FIAP)

- **2020 · Bosch Brazil (3rd place, IoT Supply Chain):** inventory automation with RFID, Firebase and Raspberry Pi.
- **2021 · Shopping do Cidadão:** document request website with an IBM Watson chatbot.
- **2022 · Ford Motor:** smart in-car multimedia integrated with Google Assistant.
- **2023 · Toledo do Brasil:** truck weighing fraud reduction using computer vision (Python and OpenCV).
- **2024 · Capstone project (TCC):** platform that orchestrates legacy scripts and runs them automatically, with no third-party dependency.

### SKILLS

- **Data:** SQL Server, Databricks, data cleaning and analysis, management reporting.
- **CI/CD & version control:** Jenkins, GitHub Actions, Git and GitHub.
- **Cloud & IaC:** Azure, Terraform, Vagrant, Ansible.
- **Virtualization:** VMware ESXi, vCenter, vSphere; OLVM (learning).
- **Linux & scripting:** Linux, Bash, Python, C/C++.
- **Networking:** fundamentals (Cisco CCNA – Introduction to Networks).
- **Languages:** Portuguese (native), English (intermediate, improving).

### EDUCATION, CERTIFICATIONS AND COURSES

- **B.Sc. in Computer Engineering** · FIAP
- **Microsoft Azure Fundamentals (AZ-900)** · AZ-104 in preparation
- **Cisco CCNA – Introduction to Networks** · Cisco Networking Academy
- **Ansible for SysAdmins** · Udemy
- **Alura** · technology courses
